

UML ASSIGNMENT

Selected System : **Library Management System**

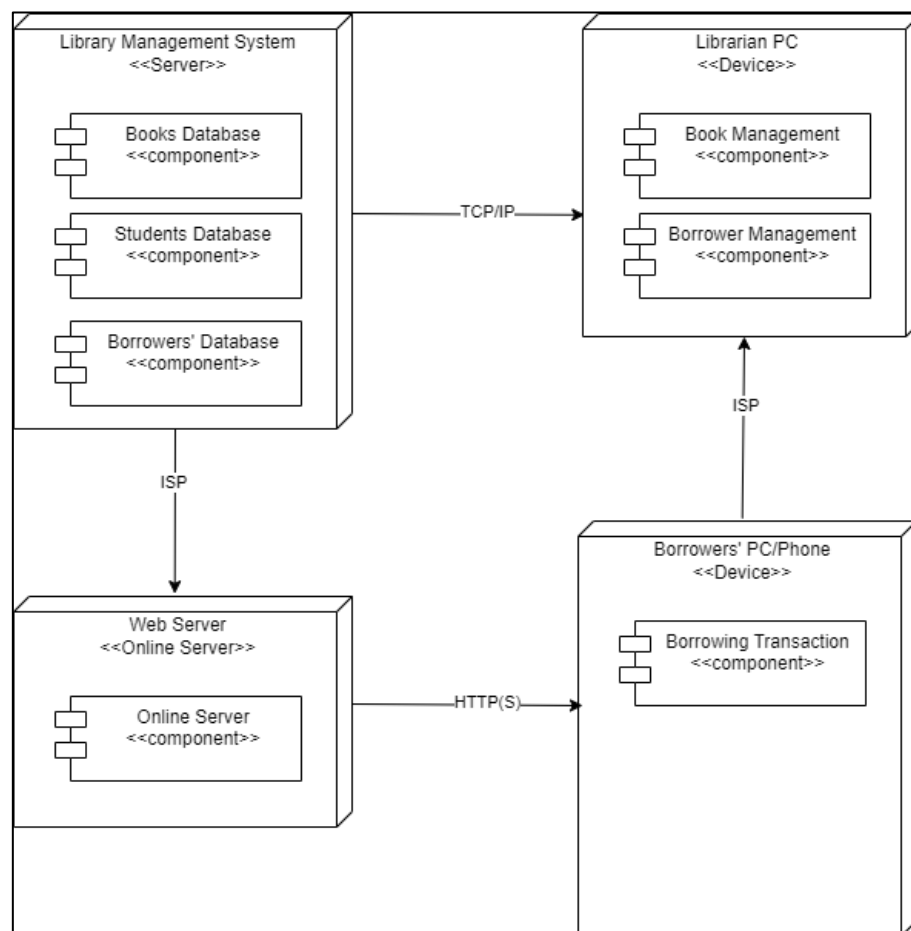

1. Package Diagram

2. Component Diagram

3. Deployment Diagram

Three important quality attributes for a library management system are:

Security : Normal users can just read information but they cannot edit or modify anything except their personal and some other information.

Performance : The system should be able to handle large amount of data. Thus, it should accommodate high number of books and users without any fault.

Usability : The system should be easy for the user to use for finding a book and borrowing it.
